DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, drawn to a method, classified in class 264, subclass 513.
- II. Claims 7-12, drawn to a window, classified in class 52, subclass 208.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process, one wherein the panel and frame are joined by comolding.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. During a telephone conversation with John Benefiel on July 23, 2001 a provisional election was made with traverse to prosecute the invention of Group I, claims 1-6. Affirmation of this election must be made by applicant in replying to this Office action. Claims 7-12 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 1-4 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ohtake et al. (US Patent 5,035,096) in view of Agrawal et al (US Patent 5,331,784). Ohtake et al. teaches the basic method as follows: forming a window with a body portion (4), which may be transparent polycarbonate resin (column 2, line 67-column 3, line 1); molding a frame portion (5) onto the body portion (4) by gas assist injection molding (column 3, lines 40-66), which forms a hollow inner space (12); and applying an opaque coated layer (11) to the frame (5). Regarding claim 1, Ohtake et al. does not teach that the body and frame portion are separately molded and then joined. Agrawal et al. teaches a method of making a window by forming a panel (22); molding a gasket (40), i.e., frame, and then sealing the gasket to the panel using adhesive, heat, and pressure (column 6, lines 23-58). It would have been obvious to a person of ordinary skill in the art at the time of the invention to use the method taught by Agrawal et al. to modify the method taught by Ohtake et al. in order to form a window wherein the panel is securely bonded to the frame.

Regarding claim 3, Ohtake et al. teaches an outwardly projecting rib (19 and see Figure 6).

Allowable Subject Matter

9. Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 1732

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kunert (US Patent 4,477,507).
